## Staff Software Engineer | Tensure @ Intuit Mailchimp

Nov 2025 – Present

- Engaged through Tensure as a consultant embedded with Intuit's Mailchimp team, delivering production features across the platform.
- Developing and shipping full-stack features end-to-end — React/TypeScript on the front-end and Node.js services on the back-end.
- Designing and refining UI/UX flows in close collaboration with product and design, balancing accessibility, performance, and visual polish.
- Leading small internal projects from scoping through delivery, coordinating timelines and decisions across cross-functional stakeholders.
- Driving code quality through reviews, refactors, and mentorship of teammates on modern React patterns and component architecture.

## Senior Full-Stack Developer | Petco

2023 – Nov 2025

- Led a team of 5 developers migrating a large legacy React codebase to modern React (hooks, functional components)
- Refactored frontend for performance, readability, and consistency with component-based architecture
- Implemented scalable solutions to reduce technical debt and improve maintainability
- Partnered with designers, backend engineers, and product managers to align UI/UX with business goals
- Established best practices in modern React, including reviews, testing, and reusable patterns

## Full-Stack Developer | Arphie.ai

2020 – 2023

- Led development of web apps with SvelteKit, delivering fast, seamless user experiences
- Built backend services with FastAPI/Flask and designed scalable microservices architecture
- Directed database design with Prisma and Supabase, ensuring secure and efficient data management
- Integrated AI-driven automation tools to streamline business workflows
- Coordinated cross-team efforts (frontend, backend, DevOps, design) for cohesive system architecture
- Collaborated with design teams to plan user flows, wireframes, and prototypes, ensuring intuitive and user-centric interfaces

## Web Developer | Sokolabs

2017 – 2020

- Developed websites using HTML, CSS, JavaScript, and PHP for web applications.
- Created backend services with PHP and MySQL to handle dynamic content and data processing.
- Developed and maintained Shopify-based e-commerce platforms from scratch or using modern JavaScript frameworks.
- Utilized GraphQL to connect and manage data efficiently in e-commerce applications.
- Worked closely with clients to implement custom website solutions tailored to their business needs.

## Skills

### Programming Languages

JavaScript (ES2015+), TypeScript, HTML, CSS, SASS, PHP, GraphQL, Python, Rust, Liquid, Markdown, Bash, PostgreSQL, C#

### Libraries & Frameworks

React, Next.js, Node.js, React Native, Tailwind CSS, Styled Components, Framer Motion, Astro, Nuxt.js, Svelte, Solid, Preact, Prisma, FastAPI, Django, Flask

### Tools & Platforms

Git, GitHub, Netlify, Vercel, Heroku, WordPress, Contentful, Sanity, Algolia, Firebase, Supabase, PocketBase, AppWrite, Medusa, Stripe, Strapi, Storybook, Docker, Shopify, Webpack, Figma, Fly, AWS, Google Cloud, Azure, Cursor, Claude Code, ChatGPT

## Education

### BS Computer Science

Universidad Tecnológica de Chihuahua

## Side Projects

### [funklo.shop](#)

Dropshipping Funko Toys

### [trendin.dev](#)

Developer trends, easy

### [lengva.org](#)

Native translation app

### [ectarea.mx](#)

Land plots management

### [abitar.mx](#)

Real estate platform

## Interests

Hockey, Books, Swimming, Music, Golf, AI and Linux world.
